## EXPERIENCE

### Upwork, Remote — *Programmer*

OCTOBER 2016 - PRESENT

- Met 100% of Deadlines
- Participated in Launch of Over 20 Websites
- Designed Front-End
- Set up personalized bot
- Scraped over 1GB of data

## EDUCATION

### Code Louisville — *Full-Stack Web Development*

SEPTEMBER 2017 - DECEMBER 2018

Built static websites from scratch, then acquired Python, SQL, ASP.NET, C#, Entity Framework, Visual Studio, React, and JSX know-how.

### Self-Taught — *Remote*

AUGUST 2016 - PRESENT

An insatiable hunger to learn has drawn me to dabble with BASIC, C, PHP, Go, NodeJS, MongoDB, Docker, SaltStack, Scala, and Sass.

## PROJECTS

### Anime App — *React/React Router/JSX*

Users can auto populate anime stats via Kitsu API, then create and save [personalized](#) anime list via the json-server API.

### Grocery App — *C#/MVC/Entity Framework/Visual Studios*

Make an account to mimic the shopping [experience](#) from start to finish as a customer or adjust inventory as a manager via the Admin panel.

### Basic Simulation and Flask App — *Matplotlib/Flask/Python*

Developed [basic simulation](#) of the card game Magic the Gathering fully-equipped with deck customization and data visualization results.

### Programming Portfolio — *Static Website*

Showcases Data Visualization and Web Development [skills](#).
